Design Sketch Checklist

Category	Description	🌡️
1. Neatness	Use clean and clear lines. Try to avoid smudges or extra marks. Erase gently if needed.	
2. Space Management	Ensure your sketch fits neatly on the page. Don't make it too small or too big.	
3. Contrast	Use a dark pencil so your lines stand out on the paper. It should be easy to see.	
4. Line Thickness	Use light, thin lines to guide your sketch. Use thicker, darker lines for the final drawing.	
5. Lighting and Shading	Show where the light is coming from. Add shadows and highlights to make your drawing look more real.	
6. Positions and Proportions	The parts of your drawing should work together to make sense. For example, avoid drawing a pencil that appears larger than a backpack.	
7. Essential Sketch Details	Include important parts that show what your drawing is about. Focus on what makes the design unique.	
8. Annotations	Add short labels or notes. These help explain how things work or what the design is made of.
